OBJECTIVE

Software Engineer that keen to play a key role from planning up to delivering a solution in the digital world and to elevate of user experience to the next level and interested in a full-time position in software development.

Technological Skills

● **React**   ● **Java**   ● Node.js

● CSS   ● SQL   ● HTML

● Javascript (ES5,ES6)/Typescript

Hackathon

Amdocs 2022 – **Development teams Hackathon**, **1st** place in 6-developer team among 60 teams (more than 100 participants), 24 hour intense of hard #teamwork for designing and implementing drag drop component to improve the user experience for our website.

Skills

- Good at teamwork and Cooperation.
- Well organized. Fast self-learner.
- Responsible.
- Time management
- Capable with meeting deadlines, and work under pressure

Languages

Arabic (Native)
Hebrew (Bilingual)
English (Advanced)

Experience

Software Engineer at Amdocs, Nazareth/Raanana
03/2021 – 12/2022

- planning and implementing user interfaces using **REACTJS**. For an account in the Philippines, my role was working in UI as well as joining Business Analysis meetings and Backend planning to deliver most efficient and effective solution.

- Work closely, with customer representatives, to improve the system UX and provide better usability and user experience for both of their agents and end users.

- Developed and maintained new features in modular highly customizable React & Redux based projects

- Identified and fixed bugs/defects in Development/Staging/Production environments, including compiled ES5 code

- Worked in Agile development teams alongside foreign coworkers and assisted new developers with their tasks

- Used enterprise-grade programs/tools such as Teams, Jira, Perforce, Jenkins, Swagger, SonarQube, GitHub

Java Full Stack Development bootcamp Amdocs & Co-impact
09/2020 – 01/2021

- RACTJS, Java Core, Advanced Java, Extreme Java, Java 8, Restful API, Spring, Spring Core, Spring Boot, Spring MVC, CSS, HTML, JS, Dockers, K8, Oracle MySQL.
- High emphasis on clean, elegant, maintainable, readable, and efficient code.

Projects

Social network for developers
11/2022 – 012/2022

- A MERN stack application Developed using **REACT and node.js** with mongoDB and Heroku Cloud
- It is a small social network app that includes authentication, profiles and forum posts, like/dislike a post and comment on a post.
- Please feel free to take a look -> https://social-network-fuad.herokuapp.com/

Coupon System Project
12/2020 – 02/2021

- Developed an application using **Java SpringBoot and Angular.**
- End to End application that allow us to handle and create query with DB.

- It acts as a Micro Service that shows an implementation which allows companies To CRUD coupons for their customers.

- the Customers can purchase and use those Coupons, and get a discount in that company's "business". (See Demo)

Education

2013-2018
- Jerusalem College of Engineering (JCE) | Jerusalem
- B.Sc. Software Engineering

2014-2016
- Private **tutor** for several courses such as Introduction to Programming in Java, Data Structures, Algorithms, and Probability & Statistics (for college students).
